---

- Technical Summary:** Over 5 Years of Professional Development Experience using the following tools: Visual Studio.Net 2003, Visual Studio 6.0 (SP4) , Office 2000/XP, SQL Server 7.0/2000, ASP.Net, C#, VB.Net, Microsoft Com+ Transactions, ASP, HTML, DHTML, JavaScript, VBScript, TSQL, e-Commerce Development, Development for Internet Explorer, IIS 4.0, IIS 5.0, WordPerfect 2000 Integration
- Current Responsibilities:** Manage a team of developers to maintain, support and enhance a Mortgage Broker loan origination web site for the premiere Mortgage Lender in the United States.
- Selected Professional Accomplishments:** <Name Withheld> *Wayne, PA*  
*Mortgage Software – Web Development Manager*
- 2001 to present** **Project: Mortgage Broker Web-site**  
Lead development and re-design of a Mortgage Broker loan origination web site using ASP and ASP.net over SQL Server 2000. Manage a team of 3 to 6 developers to meet deadlines and design solutions for enhancements to web site. Integrated new features in ASP.Net (C#) seamlessly into ASP 3.0 web-site. Enforce coding standards with code reviews and hands on mentoring.
- 1999 to 2001** **Akcelerant Consulting, LLC (Polaris Consulting & Info Technology), Malvern, PA**  
**Technology Consultant**
- Project: Subsidiary of a National Energy Company**  
Developed and designed an e-commerce web-site using ASP Pages with a SQL Server 7.0 Backend. The system passed data to third party web-sites for processing and accepted return data all in real-time. The system uploaded third party data for use in the Customer Care portion of the web-site. The system has a robust reporting system dependent on security and roles.
- Project: State Office of Information Technology**  
Assisted in developing for a web-site which allowed employees to change specific personnel information, including health insurance, direct deposit, emergency contact information and income tax information. System was developed using Active Server Pages and COM+ components running on a Windows 2000 server. The web-site was attached to SQL 7.0 Server Backend which used Stored Procedures to populate and update data from and to an ORACLE database.
- Project: City Streets Department**  
Developed enhancements and fixed issues with a MS Access 97 Application that was developed by a third party. The application tracks projects that are funded with Federal and State dollars and is used to invoice the proper government agency based on their level of economic responsibility for the project.
- Project: City Health and Human Services Department**  
Developed a reporting system in MS Access 97 for a third party application that used a Access 2.0 backend. The system is used to track and count the homeless in the City of Philadelphia. Managed and coordinated efforts among various agencies and outreach organizations to install PCs, the third party application and the reporting system which ran in a Citrix environment. Also, developed a call tracking database in MS Access 97 for emergency homeless outreach calls.

---

**Project: National Retail Auto Parts Corporation**

Developed in MS Access 97 a tax-tracking system that was an upgrade from their existing DOS based application to a Y2K compliant architecture and to take advantage of the robust nature of a Windows Application. The system has a robust reporting feature as well as the flexibility to export data for import into other legacy systems, including the general ledger. The system is used to budget for the next years tax collection as well used to audit the general ledger for both accrued and actual tax payments.

1998-1999

**TNS Intersearch Corporation, Horsham, PA**

***Market Research Firm -- Special Programmer***
